Where in the world did you come from?
Seems like I looked up and there you were
Didn't think about it then, but when I look back I believe
now
That miracles do occur

'Cause I can reach up and touch any star in the sky
Put my arms 'round the moon if I try
Never thought I could feel so much love in my life
No, I never thought I'd know how but I do now

Is this a dream or are you real
I'm trying hard not to lose my cool
When you're kissing me I just get so lost in the moment
I hope I'm not acting like some kind of fool

'Cause I can reach up and touch any star in the sky
Put my arms 'round the moon if I try
Never thought I could feel so much love in my life
No, I never thought I'd know how, but I do now

Never had no one to miss me
Never had no one who kissed me like you
Never had no one who loved me like you

I can reach up and touch any star in the sky
Put my arms 'round the moon if I try
Never thought I could feel so much love in my life
No, I never thought I'd know how

'Cause I can reach up and touch any star in the sky
Put my arms 'round the moon if I try
Never thought I could feel so much love in my life
No, I never thought I'd know how, but I do now

I can reach up and touch any star in the sky
Put my arms 'round the moon if I try
Never thought I could feel so much love in my life
