How will I know

I don't know how or where to start

Here were standing again

And I see know from where we are

That our road has come to an end

Though we come this far

I don't know what

But I still can't see who you are

Chorus:

I don't want you to cry

Don't want us to say goodbye

But I know that were falling apart

I don't need your lies

And if you don't sympathize

Tell me how will I know who you are

Its to late now but were gone this far

To see what's here within

But we said that were never apart

Baby you are trying to hard

To believe in love

I don't know what

But I still can't see who you are

Chorus:

Don't worry! promise it's for the better

So I think we should let it go now

And maby we find love again

....

Chorus:

....
