Ever since the day I met you, boy
I could see it in your eyes
There was a chemistry between the two of us
Something we could not deny
But I was too late
There was someone else
That would complicate this love
Had to fool ourselves
Pretending that you don't belong to someone else

Chorus:
Just wanna be with you
Cause I can't get you off my mind
Just gotta convince you
To give my love a try
Just wanna be loved by you
Then things will be alright
I can't have just the half of you
I intend to make you mine - all mine - only mine

No matter how hard I try I can't be strong I gotta be
where you are
And though I know it's wrong it feels so right
Whenever you're by my side
I try to fool myself
Saying that you don't have someone else

Chorus

Ooh mine
If only we could be together
We would be fine
Cause all I need is you, baby

Ooh, I just wanna be with you

Chorus
