Here's another day
Another girl left so confused
Trying to find a way
In the common likes of you
But you're so undecided
Stringing me along
And it hurts just thinking 'bout one day your here and
then your gone

Nothing to say
Wont hesitate
Can't walk away from you
You weren't there
When I was scared
Now all I wanna do is forget about love

So I don't wanna care about love
No I don't wanna care about us
I don't wanna care at all anymore
I used to only care a little bit
But now I care way too much
Now this love thing I wish I never felt it before
I don't wanna care anymore

Trying to brace myself
For the fall coz you didn't catch me
Promised that you would hold me tight, be the one I
need

But I stood waiting for you to come give me a ride
Back to what love's supposed to be; I guess that was a
lie

You and I now
I don't how
I could have fallen so deep
Coz you weren't here to wipe all my tears
Erase it from my memories
I don't want to care

So I don't wanna care about love

No I don't wanna care about us
I don't wanna care at all anymore
I used to only care a little bit
But now i care way too much
Now this love thing i wish i never felt it before
I don't wanna care

Oh my precious time; now I can't get it back
So lost and alone
And I can't take feelin' like that

Baby I've had enough
I just wanna move on
Don't wanna look back
Coz I know I gotta be strong

I don't wanna care about love anymore
I don't wanna care about us
I don't want to care about love:

So I don't wanna care about love
No I don't wanna care about us
I don't wanna care at all anymore
I used to only care a little bit
But now I care way too much
Now this love thing I wish I never felt it before
I don't wanna care

So I don't wanna care about love
No I don't wanna care about us
I don't wanna care at all anymore
I used to only care a little bit
But now I care way too much
Now this love thing I wish I never felt it before
I don't wanna care anymore
