I'm forever waiting for you to come and set me free so  
we can be scene  
its late at night i wait to hear your voice reach mine and  
then they will combine  
At last were together nothing can part us ever because  
we're together forever  
We're sole mates inside and look good on the outside  
Now what can we do to make us as strong as two  
At last we're together not can part us ever because  
we're together forever

oh oh baby forever  
i promise you this we're forever together
