Sweet lovely are you coming home some day
Everybody misses you here
I called you up last night
Spoke your name into the night
Everybody wants you down here

And I know that you're free and safe
And with god they say you are
And nobody's gonna take your place
There's just a space

When the night falls down on the lake below
I will be waiting
When the Stars shine bright on the city tonight
I will be missing you

Sweet lovely every day I try my best to be strong
The truth is that I keep myself so busy
I forget that you're gone

And I know that you're free and safe
And with god they say you are
And nobody's gonna take your place
There's just a space

When the night falls down on the lake below
I will be waiting
When the Stars shine bright on the city tonight
I will be missing you

When the night falls down on the lake below
I will be waiting
When the Stars shine bright on the city tonight
I will be missing you

You're in every little thing I do
