You've seen me too bare
I woke to find no answers
Questions stare me down
The silent sounds

A distinctive moment
I always pull away
The window closes, I...
I feel the raise

I am only human
And these moments wear me down

I can't explain
In an instant I am gone
I can't explain
But I knew this from the start

A destructive scene
I always close with
I feel the raise of solitude

And you'll be glad I never held you closer
Held you under...
What I'll be

I am only human
And these moments wear me down

I can't explain
In an instant I am gone
I can't explain
But I knew this from the start
I knew this from the start
