"Morning Love"

Night provided lovely dreams
But suddenly the sun would see us rising in the
distance
The apple tree is dancing in the movement of the ray
The thrill of watching eyes that open

Morning love
Sweet like morning love

The sky has changed to golden hue
But gained a life to wake us to the present of tomorrow
Beneath the glaze I come to you
And sway until the sky is blue
Dancing in the sunrise

Morning love
Sweet like morning love

Ooh when it's a morning love
And it's very good and sweet it's a
Morning love
Lover lover lover
In the morning love
Morning love
Sweet like morning love
