Drop all these worries and let's have some fun!

Drop these worries, hurries in flurries  
Drop those overflows, cheer grows at our shows

Checkmate, stay up late, work can wait, demonstrate  
Saddle up or shut up, fill my cup and party

Come along and just hold on to your best friends' cares  
and throw'em in the air  
Come along and tattoo this song on the air, who cares

Do you hear what I hear  
If it appears hit it cheers  
Let it down to the ground  
Red or brown just party

Come along and just hold on to your best friends' cares  
and throw'em in the air  
Come along and tattoo this song on the air, who cares

Drop all these worries and let's have some fun

Come along and just hold on to your best friends' cares  
and throw'em in the air  
Come along and tattoo this song on the air, who cares  
Do it right stay up all night step up before they close  
the door  
Come along and scream this song  
In your best friends ear till he hears  
Come along and just hold on to your best friends' cares  
and throw'em in the air  
Come along and tattoo this song on the air, who cares
