"Language Electric"

Visit "[Language Electric](#)" on MotoLyrics.com

Silence searching
Finds a voice through sound
'til it becomes language electric
Silence is screaming
Rising up through words
As it becomes language electric
Language electric
I hate you
Because I fear you
And I wanna run away
Hoping you'll disappear

Silence speaking
Finds a voice through sound
'til it becomes language electric
Language electric
Silence is screaming
Rising up through words
As it becomes language electric
Language electric
I love you
Feel me
I trust you
Forever

You say it's a battle season
And I say things I don't mean
We're both reaching trying to find a better way
To come together without hurting each other this way

When the rain falls it's speaking its tongue
And the sun rises keeping us all alive
The stream runs but it's not to get away
Do you hear its magic movements
