You used to have a fever for me darlin'
I used to have that fire in my eyes
Now we're ninety eight point six degrees and fallin'
How cold does love get before it dies?

We've got the house the fancy car
Yeah,baby we worked hard now here we are
Well,maybe we've paid more then it should cost
We got a California king sized bed then we got lost

But you used to have a fever for me darlin'
I used to have that fire in my eyes
Now we're ninety eight point six degrees and fallin'
How cold does love get before it dies?
So many friends wound up alone
Didn't know just what they had till it was gone
So,baby lock that door and turn down the lights
There ain't nobody leaving here till we get it right

You used to have a fever for me darlin'
I used to have that fire in my eyes
Now we're ninety eight point six degrees and fallin'
How cold does love get before it dies?

How cold does love get before it dies?
