All the pieces I know that make you whole
Have a way of cutting me in half
Thought I had a handle, some kind of control
But now I know I'm not getting it back

Heart and soul and all of that
You've got me
Tangled up and untied
You've got me

All the things that you do,
Things that you don't know about me
Like everything that I feel when you smile
And whenever you do makes me want to
Just freeze time around me
And stay forever in that while

Heart and soul and all of that
You've got me
Tangled up and untied
You've got me

So caught up in your whole world around me
I'd be (I would be) fine to stay, never want to leave

Heart and soul and all of that
You've got me
Tangled up and untied
You've got me
(X2)
