Sitting here in your SUV
While I waited for an almost an hour
Just to have you stop talking on your new iPhone
Just leave it alone
You got it all backwards
Are you even listening to what I say?
You putting up too much pounds of make up
I think it's time to break up
I mean come on I don't think I handle it
Staring at yourself in the mirror
For the longest time
Overdone nails like a green lime

You think you got me
But you really got yourself
You think you got me
I know all about people like you
You think you got me
Don't stop me from walking out the door
It's getting me mentally sore
I can do way better than you
Do you even know it's true?
You think you got me

Everytime we go to starbucks
You always ask me to buy a shake with my money
And you end using 10 dollars
What, you so poor you can't afford gum?
You show try to show off the hot style you got
It's getting way too old for me
And it's embarrassing to see you all flirty
But some how, it doesn't make me worry
So I think you should just go home
And leave me alone
Cause I thought you were my type
But you're just a fool in disguise
I should've realized

You think you got me
But you really got yourself
You think you got me

I know all about people like you (Cause everybody
knows)
You think you got me
Don't stop me from walking out the door (No)
It's getting me mentally sore
I can do way better than you
Do you even know it's true?
You think you got me (But you really got yourself)

So confused, had me lost
Everyday with you
Weird and shallow not so mellow
Don't you'll ever change that
Always texting on the phone
Getting so annoying
Inconsistent, narcsistic
That's just not my type
So I'm already gone
I thought you were the one
But it was just wishful thinking
I was already sinking
You have it all backwards
But you think you got it forwards

You think you got me (Oh, you think you got me)
But you really got yourself (I know about people like
you)
You think you got me (But you have it all backwards)
I know all about people like you
You think you got me (I think she's got it backwards)
Don't stop me from walking out the door
It's getting me mentally sore (Oh, no)
I can do way better than you (Without you)
Do you even know it's true?
You think you got me
But you really got yourself!
