1st Verse:

Hey what's up nothing much how about you and it's all
the same time goes by we're online it's what's to do 2
can play that game make a list blow a kiss twirl your
hair wish upon a star and when you miss throw a fit and
you'll care but it's not who you are

Chorus:

Sixteen years gone by can we fake it just one last time
while we slow dance the night away under the
moonlight (2nd and 3rd chorus add on->In hopes of
finding out an easy way to never change or grow old
and stay at this age; 3rd chorus add on->Sixteen years
gone by{3x} and immortalized in your eyes was it love
or a waste of time? This is the time of our lives)

2nd Verse:

So what's new up with you and did you hear that
Jimmy's got a crush I wonder who as he makes his
move out of fear now he's starting to blush nevermind
all the lines that your friend's use cause they don't
make much sense finding out that you doubt there's
nothing to prove and no one to impress

Breakdown:

1 time 2 many 3rd time's the charm 4 you to make up 5
good reasons while the 6th one caused you harm
commercials during 7th heaven let the news at 8 report
that 9 times 10 is the percent of 11 and 12 lost at war
and 13 is the lucky number and lucky's just what you
are all your life you've been building up for the
heartbreaks and the scars and by 14 you'll know
everything about life and you'll claim that 15's getting
old too quickly and next year's much the same..
