Before you came along life was lonely  
The real thing never came into my heart  
Since you came along, I'm not lonely  
I've a feelin' we'll never part

Since Heaven sent me you  
I'm so happy  
Do I deserve an angel from above  
Guess it must be true, still I wonder  
How it happened you came along my love

All that matters you are here beside me  
It's good to know that you understand  
It's grand to have some-one to guide me  
Until this old world comes to an end

Since Heaven sent me you, I'm so happy  
Do I deserve an angel from above  
Guess it must be true, still I wonder  
How it happened you came along my love

All that matters, You are here beside me  
It's good to know that you understand  
It's grand to have some-one to guide me  
Until this old world comes to an end

Now you are in my heart, one and only  
You've turned the life I live into a song  
My heart won't let me say that I'm lonely  
There's been a change since you came along
