(Dale Noe)

Star above please shine so bright  
'Cause I need your guiding light  
My missing angel hides from me.

Won't you hover overhead  
Send your beam on where she's fled  
My missing angel hides from me.

If it be a million miles  
I'd be on my way  
Guess I've loved her all the while  
I was wrong that day.

Where do missing angels go  
when their heart is broken so  
My missing angel hides from me.

If it be a million miles  
I'd be on my way  
Guess I've loved her all the while  
I was wrong that day.

Where do missing angels go  
when their heart is broken so  
My missing angel hides from me.

My missing angel hides from me...
