Climbing the mounds to escape from death
Ten thousand left to rot
In this gorge

Bodies lie
Putrety

I wont die
Suffocating stench of corpse's warfts
Up from the bits of deaths
Fumes disgorge

Walls steep
Rancid heap
Vapors creep

Underneath
Putrid tide
Rotted body
Land

Slide
Genocide
Mountains of dead mark the place where they died,
they died
Transfixed with horror as the corpses fall

Flesh sloughs off as I try to grasp

Start to slip
Suffocate
Corpses weight
Steals my fate

Putrid one
Underneath
Rotted body
Slide
Land

Genocide

Anguish eternally fixed in their eyes
Landslide
Rotted body
Avalanche of cadavers down the mountainside

Slide
Mountains of the dead mark the place where they died
Genocide
They died

Bodies of the dead
Smother me with rot
Remains are crushing me
Decomposing mound

This is where I die
Nameless dead my witness

Slide
Anguish eternally fixed in their eyes
Rotted body
Genocide
Landslide
Avalanche of cadavers down the mountainside
