Flesh starts to rip, gouging through skin.
>From the throat, blood gushes.
Glandular eruption.
Blistered skin secretion.
Internal punctures.
Blood regurgitation.
Shredded muscle tissue.
Wounds too deep to heal.
Severed esophagus.
Tongue split in half.
Lungs full with blood.
As vocal chords collapse.
Oral sex with broken glass.
Ruptured flesh, ripped through the neck.

Mutilate, pulsing veins.
Sliced windpipe.
Flesh starts to rip, gouging through skin.
>From the throat, blood gushes.
Glandular eruption.
Blistered skin secretion.
Wounds too deep to heal in me.
Torn trachea.
Splintered skin.
Down the throat.
Choke.
Lungs fill with blood.
As vocal chords collapse.
Oral sex, with broken glass.
