Come to the moon

By: jimmy buffett, michael utley, will jennings

1984

Full earth tonight

And mars is big and bright

All our friends are flying in

It's such a lovely sight

Gravity never could hold me

That is what you always told me

You know me

Chorus:

So come to the moon

I hope to see you soon

Half a million miles isn't far to go

You know I need you so

I hope you still need me

So come to the moon

The starship's leaving soon

Until then I'm wishing on every star

That you will be here soon

Come to the moon

Those crazy martian days

When we went separate ways

Through time and space we'd find a place

To bring our lives in phase

We're lost amid the galaxies revolving

And we're all just a part of what's evolving

Evolving

Chorus:

So come to the moon

I hope to see you soon

Half a million miles isn't far to go

You know I need you so

I hope you still need me

So come to the moon

The starship's leaving soon

Until then I'm wishing on every star

Wondering where you are

Come to the moon

Chorus:
So come to the moon
I hope to see you soon
Half a million miles isn't far to go
You know I need you so
I hope you still need me
So come to the moon
The starship's leaving soon
Until then I'm wishing on every star
That you will be here soon
Come to the moon
Come to the moon
Come to the moon
