Too young to be in love they say  
Too young to know the score  
When will we come to the age for love  
That's what we're waiting for

We know our love would pass the test  
If we could have the chance  
Well, any age is the age for love  
The age for sweet romance

Can we explain the true way we feel  
How can we show them our love is real

Someday we'll find a way to prove  
We're not too young at all  
They'll realize that the age for love  
Is ageless after all

They'll realize that the age for love  
Is ageless after all  
(This is the age for love)
