

## Jimmy Eat World "Scientific"

Visit "[Scientific](#)" on [MotoLyrics.com](https://MotoLyrics.com)

20 million miles away like something coming in.  
A tidal wave from outer space and it's so near.  
Step out of moving up you better stay on guard.  
One defender disappeared and we want him back.  
What are the kids going to be like in history?  
It's all the same fortunate I'm still around.  
Science can tell.  
Got it all wrong.

The 18 in 86 it focused in our minds.  
Wake up take up kill us all I'm grown.  
Step on up. moving up you better stay on guard.  
One defender disappeared and we want him back.  
What are the kids going to be like in history?  
It's all the same, fortunate I'm still around.  
Science can tell.  
Got it all wrong.
