Information please, tell me how my baby rides
Information please, tell me how my baby rides
She've been away a long time and I need her right here
by my side

When I got my paycheck, she wanted to visit her
hometown
When I need her loving, God knows, she can't be found
Information please, tell me how my baby rides
She've been away a long time and I need her right here
by my side

She left California, about nine days ago
Why it takes her so long, people, I just don't know
Information please, tell me how my baby rides
She've been away a long time and I need her right here
by my side
