"Piano"

It's the ending of my day
No one left to say goodbye to, except you, piano
You're not listening anyway
You're not even try to but here's one for you, piano

Seems like it always comes down to me, spinning my
piano stool
While you just sit there, grinning like a fool
One last song I gotta play, don't want to keep you up all
night though
I make it mezzo piano

Kinda tired in my own way
Trying to keep myself upright though just like you,
piano
Just keep smiling and I'll play this tune for you
Just keep smiling and we'll pull each other through

Softly, we'll play our folding music
And we'll fade, fade away
