Captivate me  
Make me believe, make me believe  
Captivate me  
Make me believe and set me free

(I know what you're talking about)

Come to me I wanna show you what a kiss  
A kiss could be  
Talk to me I'm gonna show you how to love  
To love for free  
Why are you hesitating  
It's getting late and I might turn away  
Why do you keep refrainin'  
You're always ready to get away

Love has changed, sex evolved  
Time has come to let down the wall  
If you close your eyes to the main fact  
You spread the shade as a matter of fact  
Feelin' love and then feel it free  
Caress me like a breeze on a tree  
Meant only for you to be heard '  
Cause love is more and safe is the word

Color me I wanna feel the magic of  
Your love for me  
Follow me I'm gonna take you to the land  
Of ecstasy  
Why are you hesitating  
It's getting late and I'm on my way  
Why do you keep complainin'  
You should be ready to go my way
