You've got to live with the motion
That makes you feel renewed on and on again
Just stop living on frustrations
You know the word suits you at perfection
I wanna give you a new direction
To what we've got into
I wanna live through a new sensation
Let me need you more and more again

Don't you want my love, love, love
I can give you so much more
Don't you want my love, love, love
It is the greatest gift of all

You've got to follow the action
And let your body move on and on again
I need your love and affection
Would do you feel what I'm really thinking of

I wanna give you the good vibration
To what we've got to do
I'm falling for a brand new recreation
Let me show you more and more again

Uh why can't we get together
Don't wanna deal, I wanna feel
Your love and be as one forever
Uh we could make it much better
I can't hide my needs
Any longer, any longer, any longer

Don't you want my love and rise above
You know I can give you so much more
Lovin', Lovin', Lovin' you
Don't you want my love and rise above
You know I can- give you so much more
Lovin', Lovin', Lovin' you
