## "Close To You"

Visit "[Close To You](#)" on [MotoLyrics.com](http://MotoLyrics.com)

London, Paris, Tokyo  
Thinking of you wherever I go  
And I close my eyes, you're by my side

A thousand miles can't keep us apart  
Your tender words serenade my heart  
And you keep me smiling, perfect timing

I wish that you were here with me tonight

See, I've traveled all around the world now  
And I've seen so many beautiful girls now  
But somehow no one ever comes close to you  
You know I've been to many different places  
And I've seen so many pretty faces  
But baby, no one ever comes close to you

Close to you, close to you

Planes and trains through sun and rain  
Another hotel, another day breaks and  
I'm on my way, I called to say

I wish that you were here with me tonight, yeah

See I've traveled all around the world now  
And I've seen so many beautiful girls now  
But somehow no one ever comes close to you  
You know I've been to many different places

And I've seen so many pretty faces  
But baby, no one ever comes close to you

Close to you, close to you

And it feels like you are always with me  
On these long nights in another lonely city  
You're right here, right now  
'Cause in my mind I never left at all  
Never left at all

See I've traveled all around the world now

And I've seen so many beautiful girls now  
But somehow no one ever comes close to you  
You know I've been to many different places  
And I've seen so many pretty faces  
But baby, no one ever comes close to you

See I've traveled all around the world now  
And I've seen so many beautiful girls now  
But somehow no one ever comes close to you  
You know I've been to many different places  
And I've seen so many pretty faces  
But baby, no one ever comes close to you

Close to you, close to you  
Can you hear me? Can you hear me?  
Can you hear me, baby?  
Close to you, close to you
