Featuring: JLS

We rock the, we rock the, we rock the night  
Driving down ... with the thugs on the fields  
Pretty girls looking at the hopes and the teams  
Movies stars stop by to check at the scene  
We drive through the night  
Keys to the vallet to park up the car  
Walk through the magic ...to the starpile  
The stars in the sky let you know where you are  
And the music's hot, we rock the night, oho, we rock  
the night, oho  
You know we don't stop, we do it non stop, we rock the  
night  
I love my people get it started with me, we rock the  
night  
Let's take this party where we want it to be, we rock the  
night  
We keep it moving until the morning light, we rock the  
night  
So we can have that day feel light, man you can have  
the day, we rock the night

Dance by the wu stop at Jay's  
Get a ...by the paparazzi  
... any darker, i know what you mean, just dance  
tonight, just dance tonight, feel the vibe  
You must be a vampire to live this way  
Cause we play in the dark and we sleep through the  
day  
And I feel that the sun's gonna burn me away, better  
get it right,  
We rock the night, you know we rock it baby, you know  
we live it crazy, you know it ain't a maybe

We rock the night, no matter where we're going, it's  
party at the dawning, you know it's always going  
We rock the night, i love my people get it started with  
me, we rock the night  
Let's take this party where we want it to be, we rock the  
night  
We keep it moving until the morning light, we rock the

night  
So we can have that day feel light, man you can have  
the day, we rock the night  
Whatever girl the whole town up tonight, we can light it  
up like the honey what's up?  
... how we get down, we get down  
And if you wanna come baby that's alright cause we  
got enough room in this ride  
Long as you know we ain't going on till dawn, light  
We rock the night, people ... you better throw it up,  
we're gonna blow it up  
We rock the night, and you can be ... and you can do it  
baby if you wanna, we rock the night  
I love my people get it started with me, we rock the  
night  
Let's take this party where we want it to be,  
We keep it moving until the morning light,  
So we can have that day feel light, man you can have  
the day, we rock the night  
We rock the night.
