Sitting' here, thinking'  
About the times I've been wrong  
Different men that I have known  
Of all those men that I have met  
You're the one man that I can't forget

We had our time now  
Put in bed now  
I can't forget him and I sure ain't gonna forget him, no  
Remember side street, where we used to meet  
Making love, nobody but you and me!

Champagne and wine is what you're gonna get  
Champagne and wine what it's gonna be  
Just as long, boy, as you see about me  
I'm gonna be knocking' on your door  
I want the same love that I had before

You're a man now, full grown man  
You got me eating from the tip of your hand  
I don't mind eating, long as you feed me  
Put love and put all sympathy

Champagne and wine is what it's gonns be  
Everyday it's gonna be like someday  
Every night you're gonna have stars up in the sky  
Oh, I'm giving you champagne and wine  
I'm gonna give it to you all the time  
Oh, we, baby, champagne and wine  
Oh na na na naaa...

I really do love you baby,  
I really do need you honey  
I really do want you baby,  
Champagne and wine  
Ohh...
