Never did I dream a life without your love
No love
Not without that fire inside your eyes

But now your cold as ice
We need to redefine
We used to walk the dream but now were walking the
line
Happens everytime I lose you line by line

So goodbye today
Sorry it's over
And I'm on the way
Over and over
Sorry it's over

When did you see the light on the other side?
So bright
When will you leave your life for bluer skies?

But now your cold as ice
We need to redefine
We used to walk the dream but now were walking the
line
Happens everytime you lost me line by line

So goodbye today
Sorry it's over
And I'm on the way
Over and over

So go hide yourself inside what you call a life
Don't worry love just hold your head up high

So goodbye today
Sorry it's over
And I'm on the way
Over and over
