"Be Still"

Visit "[Be Still](#)" on MotoLyrics.com

Do you have to show up on every corner
Won't the dancin' begin without you
Do you have to put on your eyes for me
Be still I love you
Now be still
We walked through space in the twilight hours
But did you really see the starset
In your restless eyes I found the city lights
Be still I love you
Now be still
Be still I love you
Be still I love you

Be still I love you
I still love you now be still
I know the child that I am has hurt you
And I was a woman when I made you cry
But a little boy wants to dry your tears
Be still I love you
Come on now
Be still I love you
Be still I love you
Be still I love you
I still love you now be still
I still love you
Come on now be still
