If you think it's hard in this day and time
To hold your man like I've been holding mine
There's no secret just some little things to do
It worked for me and it's bound to work for you
A lovin' smile will start his day out right a goodbye kiss
will bring him home at night
Reach out to him when he needs a helping hand
Touch him gently so you know he'll understand
Be proud of him when you know he's done his best
Let him know you think he's better than the rest
If you wanna hold your man this is the way
Love him more today than you did yesterday love's the
answer love's the answer
Be proud of him...
Love's the answer love's the answer
