It was on a Tuesday night
When I saw you passin' by
When you came my way in your eyes
I could see the pain inside
Then you looked at me and tried to smile
I asked what's wrong?
You said my life

So I asked can we talk about
Every little thing that's on your mind
Every little thing that makes you cry
Let me tell you all about
Every little thing that's on my heart
God's given me a brand new start
It's as easy as

1, 2, 3, Take a step toward me
I can see you're hurting
You could be so free
In a flash you could start all be over
Let me know if you wanna go there
We're just hanging out
We can talk about it

You said that's cool, but not for you
And you walked away
I tried my best, I gave my all
What else could I say?
As you crossed the street
By chance you meet an angel in disguise
Supernatural meeting of modern times

She knew
Every little thing that just occurred
Every little way you've been disturbed
Every little thing that has been wrong
Faith in God has kept her strong
Just take a step

1, 2, 3, Take a step toward me
I can see you're hurting
You could be so free

In a flash it could all be over
Let me know if you wanna go there
We're just hanging out
We can talk about it

1, 2, 3, Take a step with me
I can see you're hurting
He can set you free
In a flash you could start all over
Let me know if you wanna go there
We're just hanging out
We can talk about it

You know what you gotta do
Don't wanna confuse, but you gotta choose
You know you got nothing to lose
Don't refuse, don't refuse
You know what you gotta do
Life's already got you singing the blues
You know you've got nothing to lose
Don't refuse, take a step
It's so simple, so what you waitin' on?

1, 2, 3, Take a step toward me
I can see you're hurting
You could be so free
In a flash it could all be over
Let me know if you wanna go there
We're just hanging out
We can talk about it

1, 2, 3, Take a step with me
I can see you're hurting
He can set you free
In a flash you could start all over
Let me know if you wanna go there
We're just hanging out
