How, yeah, one chance in a million the two of us would
meet

We came face to face with our destiny
One glance in a thousand, of all the people on the
street

Would change our lives forever and make it feel this
sweet

Here we are, surrounded by a wave of love inside
Cherish me as I'll cherish you and we'll be each other's
guide

You have a commitment of love that we both need so
much
We're sharing something special that no one can touch
We have is the commitment of touch that is so rare to
find
We've got to protect it for the rest of our lives, my
darling
Is the commitment of love

Commitment of love

Let's not take for granted, treasures that we found
Counting on each other, stay on solid ground
There's so much to discover in each other's heart
Friends as well as lovers, we'll never be apart

If we open up and give enough, we'll stay forever true
Hand-in-hand, we'll understand the reason for me and
you

We have a commitment of love that we both need so
much
Sharing something special that no one can touch
We have is a commitment of touch that is so rare to
find
We've got to protect it for the rest of our lives, my
darling
It's the commitment of love, love

We'll share [Incomprehensible] and even if we fall

We'll be together and stand up through it all
So, hold me now, surrender to the bliss
Feel the bond between us, tremble with every kiss

We have a commitment of love that we both need so
much
We're sharing something special that no one can touch
We have a commitment of touch that is so rare to find
We've got to protect it for the rest of our lives, my
darling
Is the commitment of love

We have a commitment of love that we both need so
much
We have a commitment of touch that is so rare to find
We've got to protect it for the rest of our lives, my
darling
Is the commitment of love

We have a commitment of love that we both need so
much
Oh, yeah, that no one can touch
We have a commitment of touch, that is so rare to find
