"Should I Stay"

Visit "[Should I Stay](#)" on MotoLyrics.com

Thank you for the invitation
So nice to be here next to you
If you only knew what i was doin'
90 on the freeway rushing tryna get to you
I brought your favourite bubbly over
You know the kind that gets you out
You got the lights down low on perfect
How'd you know I love it
Muster in my mind

Something's telling me i got you hot right now
Something's telling me lets get it poppin' now
Your body language talking baby tell me now
Should i go
Should i stay
Something's telling me that i should kiss you now
Something's telling me go ahead and lay ya down
Your body language talking baby tell me now
Should i go
Should i stay

You got that bathroom body working
And girl that's fly how you style your hair
I wanna see you more in figure
Take that thing off
Ooo girl let it slide off

You looking at me like you wanna piece of me girl
I want you too i've been chasing you for weeks and
Its gonna be a long night
I'm ready for you
Feels like your ready for me

Slowly, that's how were gonna take it
Gradually, that's how i'm gonna take it
Ecstasy, is where i'm gonna take ya
No turning back girl
once we go there

Something's telling me i got you hot right now
Something's telling me lets get it poppin' now
Your body language talking baby tell me now

Should i go
Should i stay
Something's telling me that i should kiss you now
Something's telling me go ahead and lay ya down
Your body language talking baby tell me now
Should i go
Should i stay

Waiting for the sun to come up?
While you gettin done up
Imma tear the rear up
mess the whole house up
Waiting for the sun to come up?
While you gettin done up
imma tear the rear up
mess the whole house up

Girl don't be afraid
cos oo i'll do ya right (do ya right)
I'll do ya right (Tonight baby, oo)
Girl don't be afraid
cos oo i'll do ya right (do ya right)
I'll do ya right (ohhh ohh)

Something's telling me i got you hot right now
Something's telling me lets get it poppin' now
Your body language talking baby tell me now
Should i go
Should i stay
Something's telling me that i should kiss you now
Something's telling me go ahead and lay ya down
Your body language talking baby tell me now
Should i go
Should i stay

Something's telling me i got you hot right now
Something's telling me lets get it poppin' now
Your body language talking baby tell me now
Should i go
Should i stay
Something's telling me that i should kiss you now
Something's telling me go ahead and lay ya down
Your body language talking baby tell me now
Should i go
Should i stay
