Feel like I dated every women in the world, most were beautiful, some were cooperate worked in a lil cubical. I done some shit to some that I would never do to you, some were taylor maid but still wasn't suitable. Comes to yours I can see why you be elusive, some took advantage of you some were intrusive, some put they hands on you, some were abusive, some cheated on you must aint think you was exclusive Aint gotta say a word I already know it, and even if you scared to death it's ill that you never show it I go to sleep with fear of loosing you, and I wouldn't be surprised if I did that's typical Joe shit I lie forever, not only do she trust me, her body's a work of art there's a beauty in every ugly So for me as a friend know our past is so horrible together we wont ever have to see him again I love you

Chorus

You and I, you and I seem crazy
I would die you leave my life my baby
No one else gave a damn bout us
Where we go I dont know the future
I just know I dont wanna loose ya
Were just taking our chance on love, on love

I been with every women in this world
Except a virgin chick, some kept my soul alive just so they can murder it
Were both broken pieces, both been hurt and shit
Both took a chance on each other and it was worth the risk
She low maintenance but she deserves a grip
Give her the best of me cuz she endured the worse of it she been through so much still she carry on
So if she come wit baggage it's a carry-on
Saw her life without me, so she couldn't conceive
Tried to dump her one time but she wouldn't leave
And I ain't want her to so that was good to see
Soon as a uttered the words I damn near couldn't breath

Been through the run around, took her of the carousel
still in shocked that her passions unparalleled
I know her ex's gotta be mad as hell
But we was so broken down we had to gel
I love you

Chorus

You and I, you and I seem crazy
I would die you leave my life my baby
No one else gave a damn bout us
Where we go I dont know the future
I just know I dont wanna loose ya
Were just taking our chance on love, on love

Been wit every type of women some of the baddest
ones, still they acted young
Some were gossip queens you make that shit bitter
sweet, today that shit matters none
Some I knew wouldn't last when the crash begun, some
played it cool but wasn't half as fun
Some aint over me they just blame away, some I ruined
myself, others came that way
Some were modelesque, left started gaining weight,
others waited to gain, but met the same fate
Some move to the city for a change of pace, some I
never broke up with, just let it fade away
Some never witnessed love, don't know what we see in
it
Was a stranger for you so it's ill how you believe in it
Cuz you done dated a few, if ima take a chance on love
I thank God he let me take it with you
I love you

Chorus

You and I, you and I seem crazy
I would die you leave my life my baby
No one else gave a damn bout us
Where we go I dont know the future
I just know I dont wanna loose ya
Were just taking our chance on love, on love
