I woke up late
Fell back to sleep
Along the way
You followed me
Though forest white
A snow blown night
Blinded by your beauty, I
Lost my step
And woke up next, to you again
And smiled so wide
I couldn't hold it in so, I
Let it out, let it out loud
You're my dream tonight
You're my dream tonight
You're my dream tonight

The day is up to you and me
There is so very much to see
Now on the way
We'll walk along, the frozen lake
And sing this song
Find the spot from forest dreams
And pick it out for only we
Can find it now
We will somehow
Remain the same though ups and downs
The wind has changed, and so have we
We'll sit underneath those forest trees
Staring at the fallen leaves
With both our hearts on our sleeves
Moments come and go all day
This one will always stay
Tucked in our minds, for rainy days
We'll let it out

Let it out loud
You're my dream tonight
You're my dream tonight
You're my dream tonight
You're my dream tonight

Oh what a dream tonight, oh what a dream

What a dream, what a dream, what a dream

Later on in our bed
We'll know the wheels in our head
Spin in the same direction

Later on in our bed
We'll know the wheels in our head
Spin in the same direction

Let it out
Let it out
Let it out, loud

You're my dream tonight
You're my dream tonight, tonight
I woke up late
Fell back to sleep
Along the way
You followed me
Though forest white
A snow blown night
Blinded by your beauty, I
Lost my step
And woke up next, to you again
And smiled so wide
I couldn't hold it in so, I
Let it out, let it out loud
You're my dream tonight
You're my dream tonight
You're my dream tonight
