Our hearts have been to battle
Our souls have been to war
We've lost the will to carry on , we don't believe no
more
Oh why is it that we got it set
That this could never happen to us
How could it be . cause baby here we are

Victims of love are broken down unfair
So sad to see the debris
Scattered everywhere
Victims of love , still cannot believe
We are the victims of love
We cannot retreat

It used to be so easy , it used to be so good

We had an understanding that got misunderstood
I thought we are survivors and we'll never go down
But now were just outsiders as our love
Comes stumbling down

Refrain

Bridge :

Maybe we played it a little bit to sure
And everything is hearts and roses
Now fate stand still and closed the door
And we were just left standing
Till we realized the ending
Why so near ...
Where do we go from here ...

Refrain
