"Arms Aloft"

Visit "[Arms Aloft](#)" on MotoLyrics.com

Sometimes, there's no star shining
Scouting the edge of the universe
Sometimes, you can't see a horizon
Between the ocean and the earth
And just when you're thinking
About slinkin' down
I'm gonna pull you up
I'm gonna pull you round
May I remind you of that scene
The spirit is our gasoline
May I remind you of that scene
We were arms aloft in Aberdeen
May I remind you of that scene
Let a million mirror balls beam
May I remind you of that scene
And you say living ain't nothing but hassles
In a Manilla envelope rain
And driving coal all night to Newcastle
It's getting to be a repetitive strain
And just when you thought you're
Going down the drain

May I remind you of that scene

The spirit is our gasoline

May I remind you of that scene

We were arms aloft in Aberdeen

May I remind you of that scene

Let a million mirror balls beam

May I remind you of that scene

I'm gonna pull you up

I'm gonna pull you round

May I remind you of that scene

The spirit is our gasoline

May I remind you of that scene

We were arms aloft in Aberdeen

Let a million mirror balls beam

The spirit is our gasoline

May I remind you of that scene

We were arms aloft in Aberdeen

They say the stars can't see their rays

Nor can they count their numbered days

No flower see what perfume is

We got all this and bird and diz

May I remind you of that scene

We were arms aloft in Aberdeen

May I remind you of that scene
