[Verse 1]

I look back at the past
And I look at your mistakes
All the crying, the fighting, the yelling, and now the
heartaches
You left me at the door, screaming your name
You never even turned around, and see tears run down
my face

[Chorus]

And all I ever wanted was your love
And all I ever gave you was my trust
And all I ever wanted was someone by my side
I wanted you to make me smile, so I had no more tears
to cry

[Verse 2]

So now I turn back to the times
When you left me for those other guys
You always had somewhere to be
As if your friends were more important than me
You couldn't even take the time to sit down for a while
And yet I kept my feelings inside
And I hid it with a smile

Repeat Chorus

[Bridge]

But now that I am older now
I understand what you've been through
I know you have a lot of regrets
But it helped to shape the person you turned into
And all is forgiven now
Yet the memory lead to songs
So this song is for you
I got love for you baby
But still I turn back, baby...
