"Love Is Spreading Over the World"

Visit "[Love Is Spreading Over the World](http://MotoLyrics.com)" on MotoLyrics.com

the hills are alive and the earth is humming
love is spreading over the world
put your ear to the ground, you can hear it coming
love is spreading over the world

hear it in the trees as the breeze is blowing
see it in the fields where the grass is growing
pretty soon, the world will be overflowing
with love, sweet love

shout it down from the highest steeple
love is spreading over the world
give the word to all of God's people
love is spreading over the world

everybody's somebody's brother
now is the time to love one another
hand in hand we can make it together
love is spreading over the world

Glory, Glory what a morning
there's a promise of something new
look around, the day is dawning
let it shine, let it shine on you

shout it down from the highest steeple
love is spreading over the world
give the word to all of God's people
love is spreading over the world

everybody's somebody's brother
now is the time to love one another
God is alive and he's making a come back
love is spreading over the world

Glory, Glory what a morning
there's a promise of something new
look around, the day is dawning
let it shine, let it shine on you

shout it down from the highest steeple

love is spreading over the world
give the word to all of God's people
love is spreading over the world

everybody's somebody's brother
now is the time to love one another
hand in hand we can make it together
love is spreading over the world (uh-huh)
love is spreading over the world (oh yeah)
love is spreading over the world

the hills are alive and the earth is humming
love is spreading over the world
put your ear to the ground, you can hear it coming
love is spreading over the world

hear it in the trees as the breeze is blowing
see it in the fields where the grass is growing
hand in hand we can make it together
love is spreading over the world
love is spreading over the world
love is spreading over the world
love is spreading over the world
