Iâ€™m down the local universe  
Sometimes when I need some space  
Waiting outside heaven simply just to see her face  
To know the beauty when she moves  
You might as well explain the sky

Cause I feel, just as long as youâ€™re out there  
I can breathe do anything go anywhere  
Yes I know just as long as youâ€™re out there I try, I try

I can dream what you can see  
Only when I close my eyes  
So high an aspiration for such an ordinary guy  
To know the beauty when she moves  
You might as well explain the sky

Cause I feel, just as long as youâ€™re out there  
I can breathe do anything go anywhere  
Yes I know just as long as youâ€™re out there I try, I try
