(We've all the time, time in the world
We've all the time, time in the world)

We should slow
Yeah, we should slow down
Girl, take it easy on yourself
Take it easy on yourself

And we should show
Yeah, we should show town
That we can leave time on the shelf
We can leave time on the shelf

For this young heart's not in a hurry
Girl, there is nothing to worry about
We've all the time in the world
No, I'm not in a hurry
Girl, there's no need to worry yourself
We've all the time in the world

(We've all the time, time in the world
We've all the time, time in the world)

So let it go
Girl, just let go
The past is long gone
It's yesterday
No chance is blown
No our chance is not blown
No need to wish our lifes away

For this young heart's not in a hurry
Girl, there's nothing to worry about
We've all the time in the world
No, I'm not in a hurry
Girl, there's no need to worry yourself
We've all the time in the world

Tick, Tock, Tick
Time's a ticking bomb
No, I shouldn't be scared

I will always be there for you
Tick, Tock, Tick
Goes the tick of the clock
Time is something we just can't stop!

Still this young heart's not in a hurry
Girl, there's nothing to worry about
We've all the time in the world
No, I'm not in a hurry
Girl, there's no need to worry yourself
We've all the time in the world

For this young heart's not in a hurry
Girl, there's nothing to worry about
We've all the time in the world
No, I'm not in a hurry
Girl, there's no need to worry yourself
We've all the time in the world

(We've all the time, time in the world
We've all the time, time in the world
We've all the time, time in the world
We've all the time, time in the world
We've all the time, time in the world
We've all the time, time in the world
We've all the time, time in the world)
