Some say it's just the nature of the beast  
When you love somebody so passionately  
Time has a way of steeling the raging fire feeling  
Leaving the ashes laying at your feet

Those fools with little faith will never know  
Those higher places two hearts can go  
Where time is standing still and love will burn until  
The heavens and the earth have come and gone

This fire is out for you, is constant as the northern star  
And you will be forever in my heart  
As long as there's a river searching for an endless sea  
I will always love you faithfully

Tonight we'll raise a glass to lovers across the ages  
We'll hold each other and toast to the day  
When history's said and done and we'll still stand as  
one  
Some things were never meant to fade away

This fire is out for you, is constant as the northern star  
And you will be forever in my heart  
As long as there's a river searching for an endless sea  
I will always love you faithfully

This fire is out for you, is constant as the northern star  
And you will be forever in my heart  
As long as there's a river searching for an endless sea  
I will always love you faithfully
