It seems like we've been lovers since the start of time  
This kind of do or die don't happen overnight  
It would be an understatement to say  
I'm obsessed  
Since I live and breathe for your touch girl

I'm more then just a little  
More then just a little in love  
I'm more than just a little  
More then just a little in love

I carved your name on the sycamore in my front yard  
I got your picture taped to the dash of my car  
You can say that my behavior's adolescent at best  
But this ain't no school boy crush girl

I'm more then just a little  
More then just a little in love  
I'm more than just a little  
More then just a little in love

More and more I'm less and less  
Inclined to hold my feeling's back  
And I've got love that's in excess  
Of anything your heart could (ever)ask

It would be an understatement to say  
I'm obsessed  
Since I live and breathe for your touch

I'm more then just a little  
More then just a little in love  
I'm more than just a little  
More then just a little in love
