We're falling, we're flying
We're dreaming, we're diving
The screen's a clear blue ocean
Cascading into code
Some process of selection
The millions turn and glow
Underwater Dreamsex
We're drifting slow motion
We're breathing this ocean
I'm mixing you with me now
Somebody's playing God
We're shifting all perspective
I'm watching you dissolve
Underwater Dreamsex
Dissolving...Reforming...
You're smiling, we're falling
You're breathing in the water
Your face is ten miles deep
A taste of burning saltash
You're spinning through the street
Underwater Dreamsex
This screen is warm liquid
You're misty, you're glistening
Here come the flicker pictures
Here come the 3D screens
Here come the motion models
There go collision scenes
Underwater Dreamsex
