### "A life less ordinary"

Visit "[A life less ordinary](#)" on [MotoLyrics.com](http://MotoLyrics.com)

Live a life less ordinary  
Live a life extraordinary with me  
Live a life less sedentary  
Live a life evolutionary with me  
Well, I hate to be a bother but  
It's you and there's no other, I do believe  
You can call me naive, but  
I know me very well at least  
As far as I can tell and I know what I need

That night you came into my life  
Well it took the bones of me,  
You took the bones of me  
You blew away my storm and strife  
And shook the bones of me  
You shook the bones of me  
By the way I do know why you stayed away  
I will keep tongue tied next time

Live a life less ordinary  
Live a life extraordinary with me  
My face had said too much  
Before our hands could even touch  
To greet a hello  
So much for going slow  
Well, a little later on that year  
I told you that I loved you, dear  
What do you know -  
This you weren't prepared to hear  
I'm a saddened man, I'm a broken boy  
I'm a toddler with a complex toy  
I'm falling apart since the ambush on your heart

That night you came into my life  
Well it took the bones of me,  
You took the bones of me  
You blew away my storm and strife  
And shook the bones of me  
You shook the bones of me  
By the way I do know why you stayed away  
I will keep tongue tied but

Honey understand  
Honey understand  
I won't make demands  
Honey understand  
Honey understand  
We could walk without a plan  
Honey understand, honey  
Honey understand  
I won't rest in stone all alone  
Honey understand  
Honey understand  
I'm all ready to go  
But you already know

Live a life less ordinary  
Live a life extraordinary with me  
If I could name you in this song  
Would it make you smile and sing along  
This is the goal-- to get into your soul  
If I could make you dance with joy  
Could that be the second chance to coy  
The 'bird in hand' I would need to help you understand

That night you came into my life  
Well it took the bones of me,  
You took the bones of me  
You blew away my storm and strife  
And shook the bones of me  
You shook the bones of me  
By the way I do know why you stayed away  
I will keep tongue tied next time
