Flying over the black clouds
Forces call to me to get right down
Work it out again to catch my trout
throw it in these effects unpack

Ground breaks, direction
No one else could penetrate time

Learn you to move the grass above all time
Past moving up and all futures go back
Look at where you are you find no trace of time
Going in around in the only places you're free
Lou Bergs, you were the full taste to this from
downtown

Lou bergs, you were the full taste to this from
downtown

You say what you want it was yours an you die
to come up, you float down
i drew and agony fall
You grow back with your face down

The breast bone it feels
You glow bright and you,
you will always hear this sound

You can always have this back
Its so hard to make joy so sad
You can always just stand back
its a hearts
that make it
grow down an face it
