# "Everything Changes"

Visit "[Everything Changes](#)" on [MotoLyrics.com](https://MotoLyrics.com)

Your heart's beating around the clock  
Time tickin' away, it doesn't stop  
Evolution is takin' place  
The world is spinnin' and changin' every day  
Anything you think of with a name  
There isn't anything in life that ever stays the same

(Chorus)  
Everything changes, changes  
Things are changin' constantly  
Everything changes, changes  
It's evolutionary  
Everything changes, changes  
Changin' all the time  
Playin' with your mind  
Modified or rearranged  
Everything has got to change

You take a chance, you throw the dice  
You risk it all, it's just a part of life  
You hold on tight to what you know  
You can't hold back, you've got to let it go  
Every little step that you embrace  
One road ends, another begins  
And takes you to a better place

Repeat Chorus

Anything you think of with a name  
There isn't anything in life that every stays the same

Repeat Chorus...
