lover suffer a heart shaped like strutter
i feel it in my bones, we're breaking up on the telephone
faster cancer spreading through my answer
i'm swimming through your noise your beauty covers
up my voice

grace and control ascends like a dove
all that is good should come from your love
i'm strong as i'm fading out

another cover you crawl low distrust her
its spinning though my brain and crashing down like an
aeroplane

quicker sifter you shock shock a french kisser
i love it when we fall you're sucking sick out of my soul

grace and control ascends like a dove
all that is good should come from your love
syn like the sand and stars in the sky
give me your strength and spark in my eye
i'm strong as i'm fading out

(break)

fall down in juin
i'll rise in juillet
the summer of love has turned into night
keep your hands on the wheel and your eyes on the
road
theres no light to your love and no end to your hope

grace and control ascends like a dove
all that is good should come from your love
syn like the sand and stars in the sky
give me your strength and spark in my eye
i'm strong as i'm fading out

lover suffer
