That's right I'm elekt emerika, and this is what it's for
A simple song to sing along,
shake your head and tap your feet on the floor
I'm alive and on your record
So close love, I'll be your friend when everybody else
falls down
Turning you on 'cause I'm easy
Why doubt or question the medicine when it feels so
good
Why not take the high road darlin'
If you thought that you could darlin'
Let's take a trip to the other side sista'
You got the need, I'll make it all right
Here's to hoping we're friends to the bitter end
C'mon and follow me down
I'm your promises kept in a paper sleeve
No one has to know this because your secret's safe
with me
